

HITRUST Optimization Program

OPTIMIZE YOUR HITRUST ACTIVITIES THROUGHOUT THE HITRUST JOURNEY

Intraprise Health's HITRUST Optimization Program is a set of services purposefully designed to help your organization fulfill internal responsibilities when working with a HITRUST Assessor firm, whether that be Intraprise Health or another Assessor. The typical role of the Assessor is to perform the certification audit/assessment and submission to HITRUST. The customer plays a key role throughout the HITRUST journey, contributing time and effort to support the project, provide key pieces of information to the HITRUST Assessor, update policies and processes, interact with the MyCSF portal, etc. This can be an extremely heavy lift for customers who are often strapped for resources and not familiar with the HITRUST process and "language". For clients enrolled in our HITRUST Optimization Program, our HITRUST Optimization consultants work on your behalf as an extension of your team to remediate items necessary for HITRUST certification, alleviating a significant burden for your organization.

IMPROVE YOUR ABILITY TO MEET DEADLINES AND MANDATES

With many organizations under a mandate to become HITRUST certified, and very few having the necessary resources to achieve certification to meet deadlines, our HITRUST Optimization Program fulfills an industry need to lessen the customer burden throughout the HITRUST program lifecycle. Our optimization program focuses on quality and speed to provide additional insurance that you get HITRUST certified in time.

According to *Becker's Health*, Intraprise Health was acclaimed as one of the top security firms that healthcare organizations are likely to engage for help with their cybersecurity.

HITRUST Optimization provides the following services:

- Program Management
- MyCSF Portal Management
- Policy and process review and remediation
- Portal response documentation for HITRUST controls
- Customer assistance throughout Adoption Review and Validation
- Post-certification services

How our HITRUST Optimization specialists help:

- We translate specific HITRUST requirements and controls into readily actionable tasks
- We act as your organization's advocate, interfacing directly with your HITRUST Assessor on program requirements
- We provide a team of information and cybersecurity experts
- We tailor your security program documentation to meet HITRUST standards
- We work directly with all business units involved in the HITRUST certification initiative, such as IT, engineering, compliance, HR compliance, HR and legal
