- ✓ Industry-leading certification success rate
- ✓ Recognized for quality submissions and proven methodology
- ✓ Numerous joint presentations and educational workshops
- ✓ Executive-level relationships with HITRUST's leadership team

WHY HITRUST?

HITRUST is the "Gold Standard" of Healthcare Data Security

Healthcare payers, and an increasing number of health systems and hospitals, are requiring their business associates to become HITRUST certified because the certification demonstrates that the organization has made a dedicated commitment to maintain the greatest level of protection for their customer's healthcare data.

Scalable and Cost-Effective

By including federal and state regulations, standards, and frameworks, and incorporating a risk-based approach, the HITRUST CSF helps organizations address rapidly-evolving information security challenges affecting every healthcare organization no matter the size.

Assess Once - Report Many

Because of its consolidated controls approach, an organization can generate multiple reports addressing legislative, regulatory or best practice frameworks with just one assessment, creating a well-established, robust, and documented security program to present whenever needed.

Reduce Risk

To achieve HITRUST certification, organizations undergo rigorous reviews to ensure they meet regulatory compliance and risk standards including NIST, HIPAA, ISO, PCI and state laws.

Competitive Advantage

HITRUST Certification demonstrates that an organization is a leader in security, privacy, and compliance because they have the certification to back it up. This credibility and status in the healthcare industry sets an organization apart.

Intracorp Health HITRUST Optimization Services

Our Optimization Program consultants work on your behalf as an extension of your team alleviating a significant burden for your organization. Our Assessor services combined with Optimization services deliver an end-to-end HITRUST certification solution.
