Intraprise HEALTH

Cybersecurity Resilience Roadmap Session

The process to reduce risk doesn't happen overnight

Every organization needs a strong foundation of practical, simple, and effective security measures. Empower your organization with a strong cybersecurity foundation

We are offering MEDITECH hospitals and health systems a complimentary Roadmap and Planning Session to define the practices and activities that will result in a highly resilient cybersecurity posture.

An Intraprise Health Cybersecurity Expert will guide you through a road mapping session utilizing a comprehensive checklist of activities across key security program areas of focus that result in a well-structured and best practices based multi-year plan for your organization. Our road mapping sessions are designed to facilitate cybersecurity planning over the next 24 to 36 months based on your organization's priorities and areas of need.

What's Included?

Roadmap Session

- Review of Current Security Program practices, activities, and capabilities
- Review of prior year's security program assessment
- Preparation of an annual and quarterly checklist

	Daily	Weekly	Monthly	Bi-Monthly	Quarterly	Annually
