

HIPAA Compliance for Hospitals

SIMPLIFY AND AUTOMATE YOUR HIPAA COMPLIANCE WITHOUT RAISING COSTS

HIPAA compliance and data security are more important than ever for hospitals and health systems. Healthcare organizations must regularly perform a Security Risk Assessment (SRA) to maintain HIPAA compliance and fulfill their obligations to PHI security and privacy.

Managing compliance can be a messy, tedious task – especially if you are using spreadsheets and emails and are dealing with hundreds of individual clinics and practices.

Simple, automated, and affordable, our SRA software removes the administrative burden of compliance, allowing you to manage, monitor, report, and track in one dashboard.

Our cloud-based software follows OCR Audit Protocol and is based on NIST-methodologies to help organizations appropriately respond to and mitigate risks.

Expertise when you need it

For those hospitals who need some extra guidance, our HIPAA consultants are available.

Advantages of the Intracorp Health HIPAA One® cloud-based software:

- Step-by-step guided approach to compliance
- Up-to-date software including citations for HIPAA and NIST
- Access to our certified Assessors

Enhanced Capabilities for Hospitals include:

- Automated task reminders
- Send pre-filled questions to your physician practices and clinics
- Manage all SRAs in one place – audit once, report many. No more juggling spreadsheets!
- Calculated risk assignment and prioritization
- Remediation tracking and action history
- Real-time reporting and final reporting
- Year over year import of assessments

SECURITY RISK ASSESSMENT ENGAGEMENT TYPES

Self Assessment

Independently Conduct your Risk Assessment

Facilitated Remote Assessment

Online Assistance to Conduct your Risk Assessment

Validated Assessment

Assessor-led Risk Assessment

Every Security Risk Assessment incorporates OCR Audit Protocol and maps findings to the NIST Cybersecurity Framework with optional Technical Security Baseline Questions

WE PROVIDE THE STRUCTURE, DETAIL, AND CLARITY YOU NEED TO:

- Evaluate HIPAA/HITECH compliance
- Document current state of security controls
- Meet the requirements associated with Meaningful Use
- Identify gaps that pose true business risk
- Create a practical remediation roadmap
- Establish a sustainable operating model for information security and privacy

Our Security and Privacy Risk Assessments will help you:

- Identify threat sources and events
- Identify vulnerabilities
- Determine likelihood of breach occurrence
- Determine magnitude of impact
- Understand your risk

Is your Microsoft 365 HIPAA Compliant?

Our HIPAA-centered Microsoft Office 365 (M365) audit establishes organizational compliance with administrative, physical, and technical safeguards for the protection of electronic health information. The audit includes an analysis based on HIPAA security rule requirements, and implementation planning with in-house IT professionals to remediate compliance gaps.

Need Help Accessing the LADMF?

Healthcare organizations must access the Limited Access Death Master File (LADMF) to keep records up to date and prevent fraud. HIPAA One qualifies as an independent third party organization and can act as an Accredited Conformity Assessment Body (ACAB) for organizations that wish to access the Limited Access Death Master File.

OUR ASSESSMENT PROCESS

“ We love the HIPAA One software. It helps make an otherwise complex and overwhelming process manageable and straightforward.”

– Senior IT Director, Large Hospital

Intracorp Health's cloud-based HIPAA One® compliance software is designed to simplify and automate HIPAA compliance for healthcare providers, health plans, and business associates of all sizes. Our HIPAA One solutions include security risk assessment, privacy and breach assessment, HIPAA workforce training, vendor management, and third-party validation. The software scales from single-doc practices to enterprise organizations needing to simplify complex problems, provide macro-analytics and “always current” HIPAA controls.
