

NIST Security and Privacy Framework Assessments

BUILD A FORWARD-THINKING SECURITY AND PRIVACY PROGRAM

Adopting the NIST Risk Management Framework provides organizations with a “common language” to measure cybersecurity and privacy risk and a clear way to communicate compliance to internal and external stakeholders.

Intraprise Health’s NIST Framework Assessment Platform helps organizations adopt the NIST Framework, identify and prioritize cybersecurity risks and measure the impact of each dollar spent on cybersecurity.

Using the Intraprise Health NIST Framework Assessment Platform to assess and improve management of cyber and privacy risks puts organizations in a better position to identify, protect, detect, respond to, and recover from an attack.

Highlights

- Comprehensive software that is easy to implement
- Cross team delegation capabilities enhance productivity
- Dashboards to measure, visualize and analyze NIST CSF and Privacy maturity
- On demand customizable reports for management review
- Vulnerability scan to gather technical risks
- Access to experts for remediation planning and implementation

The screenshot displays the assessment platform interface. On the left, there are navigation buttons for 'NIST Security Assessment', 'NIST Privacy Assessment', and 'NIST Security and Privacy Assessment'. The main content area shows 'Question 1 of 9' with a progress bar. The question text asks about the primary location named 'New HIPAA NIST' and whether senior executives understand their privacy and security roles. Below the question is a 'Notes' field for providing summary notes and documentation. At the bottom, there are 'Attachments' and 'Status' options (Flag, Complete). On the right side, a 'Function' and 'Category' dropdown menu is visible, along with a list of 'Informative References' including HIPAA, NIST SP800-53Rev.5, ISO-IEC 27001:2013, ISA 62443-2-1-2009, COBIT5, and CIS CSC.

OUR PLATFORM DIFFERENTIATORS

NIST Framework Assessment Platform Capabilities

- ✓ Simplest way to align your cybersecurity and privacy programs with NIST and CMMC
- ✓ Built and supported by our NIST experts with fast and easy implementation in mind
- ✓ Identifies gaps set against self-selected program maturity targets
- ✓ Three implementation options: Self, Facilitated, and Managed Service
- ✓ Digital validation certificate provided with on-demand, customizable reports
- ✓ Assessment and maturity dashboards

OUR SERVICE DIFFERENTIATORS

Intraprise Health Assessor Support and Expertise

- ✓ NIST experts with understanding of NIST Risk Management Framework and CMMC requirements
- ✓ Deep healthcare expertise
- ✓ Experienced and certified cybersecurity specialists
- ✓ Assessors to review assessment and provide recommendations of how to accelerate/evolve towards a greater level of maturity

OUR NIST FRAMEWORK ASSESSMENT OFFERINGS

You can complete a NIST Security or NIST Privacy Assessment independently using the Intraprise Health NIST Framework Assessment Platform, or if you would like additional validation assistance, our expert assessors will work with you to complete your assessment, answer questions, and provide strategic and tactical support.

ABOUT INTRAPRISE HEALTH

Intraprise Health is an industry leading “tech-enabled” healthcare cybersecurity and risk management services provider. One of the longest tenured HITRUST Assessors in the industry, our broad range of information security, privacy and compliance services include: HITRUST Certification, Third-Party Risk Management, NIST Cybersecurity Framework Adoption, Advisory and Planning Services, Remediation Management, Incident Response and Business Continuity. We deliver HIPAA Security Risk Assessments and Workforce Training via our HIPAA One® platform. Our next generation BluePrint Protect™ platform, based on the NIST Risk Management Framework, provides intelligent monitoring, workflow management and collaboration capabilities.
