Automate Security & Privacy Compliance Risk Management for Healthcare

HOLISTICALLY ADDRESS HIPAA COMPLIANCE

Are you looking for a better, more efficient way to improve your HIPAA compliance while also identifying gaps and risks across the enterprise? Intraprise Health's HIPAA One® solution is a simple but powerful software solution that automates your compliance and risk analysis program. HIPAA One enables you to *accurately address all HIPAA standards and implementation specifications, in one single pane of glass view.*

Reduce the Potential of a Breach or Fine by Uncovering Hidden Risks and Gaps

Addressing one of the most concerning areas of hidden risk, HIPAA One's "Dynamic Templates" feature leverages your corporate-level HIPAA program assessment to perform practice and site-level assessments at scale and cost-effectively, providing hospitals with a more accurate view of enterprise risk, along with more complete compliance with HIPAA.

Simple to Use, Automated, and Cost-Effective, Our Customers Report Efficiency Gains of Over 3x Year Over Year.

Our purpose-built software allows health systems and insurers to reduce the time and effort of performing risk assessments and focus more efforts on risk management and gap remediation resulting in an improved cybersecurity posture. Removing the administrative burden of compliance, our HIPAA One solution allows you to easily manage, monitor, report, and track your assessments and remediation activities from one central location. With over 10,000 assessments performed on the platform, our features and capabilities are proven to reduce the ongoing costs of compliance while increasing productivity.

HIPAA Compliance Challenges:

- Juggling spreadsheets and emails to manage risk analysis and security assessments
- Time consuming – lacking automation
- Manual process often managed via spreadsheets and various documents
- Lack of resources and staff
- Lack of time for remediation – majority of time spent on assessing
- Lack of visibility into practice-level compliance

Rev. 8/18/2022

HIPAA One® ENTERPRISE FEATURES:

- End-to-end HIPAA Security and Privacy Risk Analysis Automation
- Manage all assessments in one place – assess once, report many. No more juggling spreadsheets!
- Assessment auto-populate feature – year-over-year continuity of responses and supporting documentation
- Leverage your corporate assessment to increase coverage of provider practice and remote site assessments with the "Dynamic Templates" feature
- Remediation Management – remediation simplified, prioritize and track risk levels
- OCR-Readiness and MU Compliance with Action History feature
- Achieve compliance with CMS Meaningful Use requirements
- Standards and requirements mapped to **NIST Cybersecurity Framework**
- Create custom reports for technical teams as well as executive/Board-level summaries

Assessment Types

Self Assessment

Independently Conduct your Risk Assessment Utilizing HIPAA One®

- System-generated risk ratings and remediation recommendations
- Customizable report findings

Validated Assessment

Remote and/or On-Site Assessor-Managed Risk Assessment Utilizing HIPAA One®

- Risk assessment validated by our Assessors
- Remediation recommendations provided by our Assessors
- Technical and executive level presentations

Gain a Clear Understanding of Your HIPAA Security in our Integrated Risk Management Platform

Included with our HIPAA One® Security, Privacy and Breach Risk Assessments is a differentiated, healthcare-focused solution for visualizing and analyzing risks generated from HIPAA Risk Assessments. One of the only healthcare focused risk management platforms, our BluePrint Protect™ Integrated Risk Manager (IRM) seamlessly **imports assessment risks** and key metrics, in real-time. All dashboards provide drill-down capabilities back to the original security or privacy control, allowing for problem resolution and monitoring capabilities. Built upon NIST standards and using the Open Security Controls Assessment Language (OSCAL), BluePrint Protect IRM ensures risks are normalized and interoperable. Users can consolidate Risk data from HIPAA One, NIST or third-party assessments and different Risk sources to build their risk register, creating an action-based Framework from which to view and manage enterprise-wide risks.
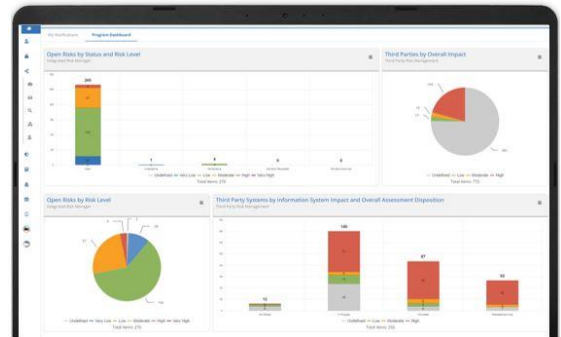

Intraprise Health's cloud-based HIPAA One® compliance software is designed to simplify and automate HIPAA compliance for healthcare providers, health plans, and business associates of all sizes. Our solutions include security risk assessment, privacy and breach assessment, HIPAA workforce training, NIST assessments and third-party risk management. The software scales from single-doc practices to enterprise organizations needing to simplify complex problems, provide macro-analytics and "always current" HIPAA controls.
