Automate Security & Privacy Compliance Risk Management for Healthcare

HOLISTICALLY ADDRESS HIPAA COMPLIANCE

Are you looking for a better, more efficient way to improve your HIPAA compliance and security posture, avoid annual "assessment fatigue" and focus more of your resources on actually remediating risks? Intraprise Health's HIPAA One® Enterprise solution automates compliance, remediation and risk mitigation within a "single pane of glass view" risk management platform. Easy-to-use yet powerful and backed by our team of certified healthcare security experts, HIPAA One® Enterprise provides unique features and comprehensive services to address the needs of Hospitals, Payers and Business Associates.

Reduce the Potential of a Breach or Fine by Uncovering Hidden Risks and Gaps

The combination of workflow automation software and seasoned healthcare security professionals allows clients to address compliance and risk management holistically across the enterprise. The ability to meet our clients "where they're at" while onboarding them onto a risk management platform that provides risk analysis and breach prevention, audit preparedness and pathway towards a more mature security posture.

Simple to Use, Automated, and Cost-Effective, Our Customers Report Efficiency Gains of Over 3x Year Over Year.

Our purpose-built software allows you to reduce the time and effort of performing risk assessments and focus more efforts on risk management and gap remediation resulting in an improved cybersecurity posture. Removing the administrative burden of compliance, our HIPAA One solution allows you to easily manage, monitor, report, and track your assessments and remediation activities from one central location. With over 10,000 assessments performed on the platform, our features and capabilities are proven to reduce the ongoing costs of compliance and risk assessment.

HIPAA Compliance Challenges:

- Lack of resources and staff

- Lack of time for remediation – majority of time spent on assessing not fixing

- Lack of Proper Tools - using spreadsheets to manage risk and security

- Time consuming – manual processes often managed via static documents and email

- Lack of Visibility – not able to see enterprise-wide risks in a centralized view

HIPAA One® Enterprise FEATURES:

- End-to-end HIPAA Security and Privacy Risk Analysis Automation
- Manage all assessments in one place – assess once, report many. No more juggling spreadsheets!
- Assessment auto-populate feature – year-over-year continuity of responses and documentation leading to 60-80% efficiency
- Leverage your corporate assessment to increase coverage of provider practice and remote site assessments
- Remediation Management – remediation simplified, prioritize and track risk levels
- OCR-Readiness with Action History feature
- Achieve compliance with CMS Meaningful Use requirements
- Standards and requirements mapped to **NIST Cybersecurity Framework** and other relevant standards
- Create custom reports for technical teams as well as executive/Board-level summaries

Assessment Types

Guided Assessment

Conduct your Risk Assessment Utilizing HIPAA One®

- System-generated risk ratings and remediation recommendations
- Customizable report findings

Validated Assessment

Remote and/or On-Site Assessor-Managed Risk Assessment Utilizing HIPAA One®

- Risk assessment validated by our Assessors
- Remediation recommendations provided by our Assessors
- Technical and executive level presentations

Achieve a "single pane of glass view" of risks with our Blueprint Integrated Risk Management Platform

Integrated with our HIPAA One® Security, Privacy and Breach Risk Assessment module is a differentiated, healthcare-focused solution for visualizing and analyzing risks generated from HIPAA Risk Assessments. One of the only healthcare focused risk management platforms, our BluePrint Integrated Risk Manager (IRM) seamlessly **imports assessment risks** and key metrics, in real-time. All dashboards provide drill-down capabilities back to the original security or privacy control, allowing for problem resolution and monitoring capabilities. Built upon NIST standards and using the Open Security Controls Assessment Language (OSCAL), BluePrint Protect IRM ensures risks are normalized and interoperable. Users can consolidate Risk data from HIPAA One, NIST or third-party assessments and different Risk sources to build their risk register, creating an action-based Framework from which to view and manage enterprise-wide risks.
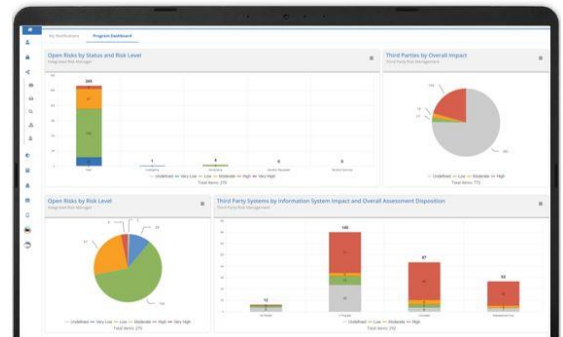

Intraprise Health's cloud-based HIPAA One® compliance software is designed to simplify and automate HIPAA compliance for healthcare providers, health plans, and business associates of all sizes. Our solutions include security risk assessment, privacy and breach assessment, HIPAA workforce training, NIST assessments and third-party risk management. The software scales from single-doc practices to enterprise organizations needing to simplify complex problems, provide macro-analytics and "always current" HIPAA controls.
